

András Volford for Secretary

Proposed by Attila Szabó, Secretary 2016 - 17

Seconded by József Herczeg, General member 2015 - 16

I am a second year undergraduate at St Catharine's College, studying Chemical Engineering. Since I started my studies here, I have been an enthusiastic member of the Society. I have attended as many events as I could, always enjoying the company of the other members. I was involved with the committee as a General member during the last year. Now, I would like to take the opportunity and apply for the position of Secretary for the coming academic year.

What would I do?

- Provide clear communication between the members and the committee
- Organise committee meetings and write minutes
- Circulate these minutes to keep everyone in the Society briefed on the recent matters
- Maintain the membership database and mailing list set up by the previous secretaries (Zoltán Szenczi and Attila Szabó)
- Contribute to the smooth running of the Society by supporting the President and the members of the Committee in their roles

Why vote for me?

- I have attended several committee meetings already, so I have gained an overview of the operation of the Society.
- I will make sure that new ideas from anyone are listened to and they can be addressed to the Committee.
- I am approachable and well-organised, I think that both of these qualities are essential for this role.
- I can handle short notices, so if something urgent is needed, I usually respond quickly and get the job the done.

Thank you for taking the time to read my manifesto.
